

(a) Neutrino-mass markers and published DESI DR2 bounds

circles: exact-rule markers · triangles: published 95% upper limits

EXACT RULE

NO · $m_1 = 0$

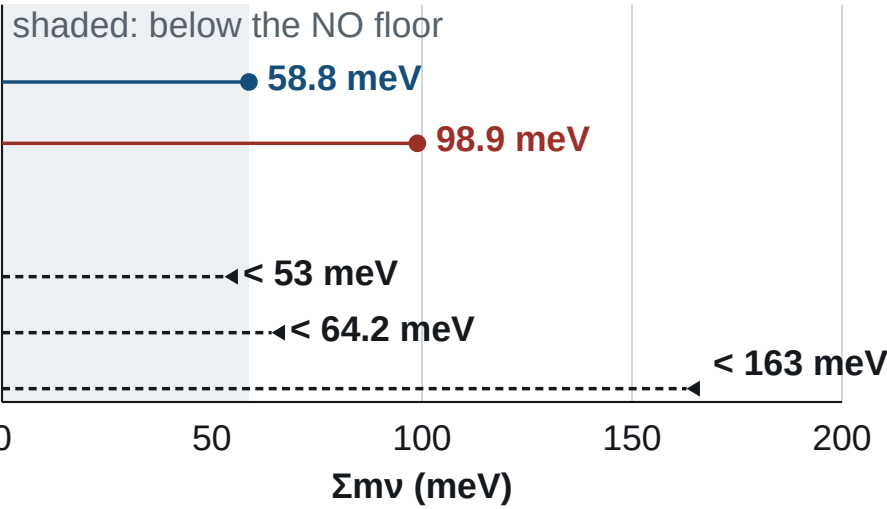

IO · $m_3 = 0$

PUBLISHED LIMITS

Feldman–Cousins

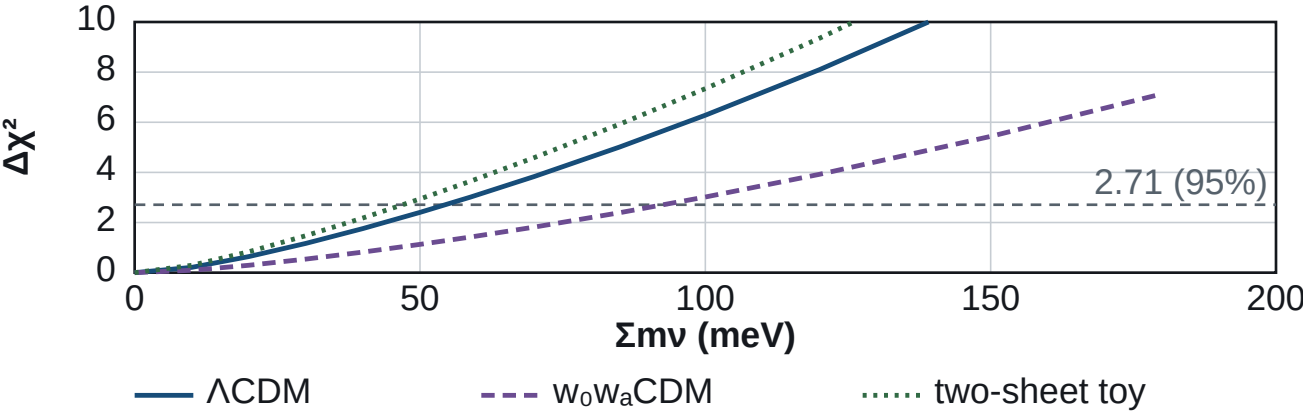

DESI DR2 · Λ CDM

DESI DR2 · w_0w_a CDM

(b) Geometry-only mass profiles

BAO + Pantheon+ + ω_{cb} prior + θ^* . No CMB lensing or primary-CMB amplitude. Each profile: relative to its own minimum, not a substitute for panel (a).

(c) Exact- Λ stance and published DESI DR2 + CMB fits
